HELP! In case of Accidents.

Drowning. 1. Loosen clothing, if any. 2. Empty Lungs of water by laying body on its stomach and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils and pressing the "Adam's apple" back, (so as to close entrance to stomach), direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. DON'T GIVE UP! People have been saved after HOURS of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give WARM drinks, or spirits in teaspoonfuls, fresh air and quiet.

Burns and Scalds. Cover with Cooking Soda and lay wet cloths over it. Whites of Eggs and Olive Oil. Olive or Linseed Oil, plain, or mixed with Chalk or Whiting.

Lightning. Dash cold water over a person struck.

Sunstroke. Loosen clothing. Get patient into shade, and apply ice-cold water to head.

Mad Dog or Snake Bite. Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife.

Venomous Insects Stings, &c. Apply weak Ammonia, Oil, Salt Water, or Iodine.

Fainting. Place flat on back; allow fresh air, and sprinkle with water.

Tests of Death. Hold mirror to mouth. If living, moisture will gather. Push pin into flesh. If dead the hole will remain, if alive it will close up.

Cinders in the Eye. Roll soft paper up like a lamp lighter and wet the tip to remove, or use a medicine dropper to draw it out. Rub the other eye.

Fire in one's Clothing. Don't run, — especially not down stairs or out of doors. Roll on carpet, or wrap in woolen rug or blanket. Keep the head down, so as not to inhale flame.

Fire in a Building. Crawl on the floor. The clearest air is the lowest in the room. Cover head with a woolen wrap, wet if possible. Cut holes for the eyes. Don't get excited.

Fire in Kerosene. Don't use water, it will spread the flames. Dirt, sand or flour is the best extinguisher; or smother with woolen rug, table-cloth or carpet.

Suffocation from inhaling Burning-Gas. Get into the fresh air as soon as possible and lie down. Keep warm. Take Ammonia, — twenty drops to a tumbler of water, at frequent intervals.

ANTIDOTES FOR POISONS.

San Juan.

In view of the signal events of the past
 few weeks and their critical effect upon the
 destinies of two countries which are, by virtue
 of authorized pledges, actual and implied, one
 and the same, it is expedient that the people
 of the United States should become aware of
 the memorable pledges made in their behalf
 at the time of the occupation of our Island;
 what the National Legislature is doing regard-
 ing the fulfilment of those obligations; and,
 lastly, what the people of the Island have a
 right to expect by way of civil rights and pri-
 vileges—what they may equitably demand not
 only for the restoration of their former pros-
 perity, but for the preservation of their very
 existence.

In the summer of 'ninety-eight Gen. Nel-
 son A. Miles and a small army accomplished a
 practically bloodless victory over an island
 which had been four hundred years under the
 yoke of Spain misrule. Instead of enemies,
 he found only friends; instead of shot and
 shell, only cheers of welcome, and planting
 there the flag which was hailed as the symbol
 of a people's deliverance, he promised "pro-
 tection not only to the Islanders but to their
 property"; and "to promote prosperity, and
 bestow upon them the immunities and bles-
 sings of the liberal institqtions of the Ameri-
 can Government."

Not content, however, with allowing the
 people of Puerto Rico to remain in ignorance
 of their exact *status* as either citizens or sub-
 jects of their adopted country; deaf to their
 cries of distress and blind to their imperative
 needs, the National Congress now proposes to
 add ignominy to sorrow and injustice to afflic-
 tion by imposing upon the Island, systems of
 taxation and vassalage as immoral in principle
 as they are questionable in purppse; as odious
 to freedom-loving Americans as they are ob-
 noxious to the people they oppress, and iden-
 tical with those which drove the American
 patriots of '76 to resist and destroy by force of
 arms the tyrant that imposed them.

Against the express will and wish of the
 Chief Executive in his last message to Con-
 gress; against the solemn vows of the soldier who
 first hoisted the flag of freedom over Puerto
 Rican soil; against the advice of the honor-
 able Secretary of War; the Governors Gene-
 ral of the Island; the recommendations of the
 President's Special Commissioner; and the
 United States Consul General to Puerto Rico;
 against the just demands of the Puerto Rican
 Delegates; and above all against the combin-
 ed sentiment of the representative press and
 seventy-five millions of people, whose expon-
 ent it is,—an unjust and odious tax measure
 has passed the House of Representatives, and
 it is now even proposed to set aside all meas-
 ures establishing civil government for the Is-
 land.

The American people and the press, who,
 thrusting aside all Constitutional questions
 and all subterfuges or sophistries, have recen-
 tly, almost with one voice, emphatically dem-
 anded for Puerto Rico as *her right*, free com-
 merce with the United States, will be starte-
 ed and indignant beyond measure to learn that
 it is now proposed to fling the reduced tariff

so little ago, every good thing under the folds
 of the American flag?

It arouses the utmost indignation that a
 million-intelligent Christian people, nearly
 eighty per cent. of Caucasian birth, long in
 the enjoyment of the highest rights of repres-
 entation in the National Cortes of Spain; who
 have had universal suffrage, municipal auton-
 omy, and (substantially) free commerce with
 their sovereign country for years; a commu-
 nity whose thrift, freedom from debt, virtue,
 and achievements bespeak its character
 which freed its slaves on its own motion, and
 paid for them without murmur; whose ste-
 adfastness gave it the name, even in Spain
 of «The Ever Faithful Isle,» must now plea-
 for those fundamental civil rights which the
 Fathers of the great Republic declared to be
 «the inalienable rights» of every man.

To deny immediate stable civil governn-
 ent to Puerto Rico means (beside the vio enc
 done the overwhelming and unanswerable
 moral considerations which demand it):—

First. To continue upon a million people
 without defensible warrant or excuse, the
 always blighting and repressive effects of mi-
 litary government, alike abhorrent to the
 people of the United States and of Puerto Ri-
 co, for military government is repugnant to
 American ideas, is never progressive, and ca-
 at most only hope to maintain order and pr-
 serve the *status quo*. It breeds distrust, sup-
 presses ambition, stimulates resentment, and
 destroys every incentive an hope:

Second. It means to prevent the inves-
 tment of capital, the extension of trade-ente-
 prises, or the development of the resources of
 the island. Capital will not venture where
 trade-conditions, government, and laws are
 not stable and without capital to rehabilitate
 her ruined interests, restore her industrie
 and develop her resources, Puerto Rico must
 revert to a state of nature, which in the tropi-
 it requires but a few months of neglect
 effect:

Third. It means the absence of adequate
 law to protect person and property, regula-
 society, and advance agriculture and com-
 merce:

Fourth. It means that no authority can
 exist for the negotiation of a Territorial loan
 whereby the Island, pledging its credit and
 resources, can alone raise the funds *absolut-
 essential* for the maintenance of public wor-
 and improvements, educational advantage
 and assistance to the ruined agriculturist
 upon whose prosperity the very life of the
 Island must depend. It was to enable Cong-
 to authorize and arrange this loan in the
 interests of agriculture that the Presid-
 extended for six months, the prorogation
 mortgage foreclosures:

Fifth. It means idle and wasted plan-
 tations, deserted sugar mills and factories,
 stagnant commerce, a wandering and starv-
 people,—an utterly and cruelly desolated and
 ruined Island.

Taken by the war-power of this Repub-
 —the most enlightened, resourceful and pow-
 ful of the Nations—into its possession, w

Then called on Maj. Glanville and returned answers to him. Considered it wise to keep quiet during the hot part of the day and rested accordingly. But as that coach would have it it was full and we were in a fix out of which the steamer offered to help us at twice the coach rates. We accepted gladly, and after some delay - they could not find the key to the coach house - went away at 3.40 in his rickety rig, arriving in Fajardo at 5 and stopped at Mr. A. Holst's hotel. Spent morning writing, while R. was at the museum naming the birds, also hunted around for information, like yesterday for information as to how to get to St. Thomas and when. It was suggested at the custom house that we go to Culibra and take the coast survey s.s. there who goes every Sunday to St. Thomas. - Spent afternoon in very hard work at quartermaster's wharf unpacking and packing P.R. specimens for shipment home, also out of outfit for future trip.

To test our strength we made a trip out to Odayanum to visit the cave and see if we could get any bats. We climbed a steep hill, which fatigued us very much and we found a ^{small} cave, but no bats. Afterward visited Dr. Stahl, who said he would make special efforts to get two for me. Formerly they were common in the neighborhood, though he himself had never seen or his specimens they were brought him by the farmer. now they are rare, he attributes it to the negroes, but I doubt. *Habits nocturnal.*

Spent all morning at the quartermaster's wharf packing specimens to be returned with tomorrow's transport. Harder and longer work than might be expected. In the afternoon, with L. Mc. Connick took sailboat for Puerto Rico for Cienega de Fari in search of bats. Land after the usual trouble on the mudflats. Got 48 specimens representing 5 species, 2 being additional to those obtained previously. Returned at 7 pm.

Went at 9 o'clock to quartermaster's wharf with my bag of bats (40) to inject and place in alcohol as our whole outfit is there. It took almost all forenoon, while R. was at home in the hotel skinning the others. Returning I helped R. cleaning the skulls and pinning up the skins. That kept us busy until some time into the afternoon.

With a couple of showers in the morning. Forenoon spent in making good by calls, to governor, Major Clegg, Major Glanville, who was not in S.J., Weather Bureau, Dr. Weber. Also at custom house where we got food's answers in reply to questions for information. Then to steamer Porto Rico and Longfellow, the latter taking in lumber for the "Hale" at Culibra, but as she is going all around the island due at Culibra Sunday, we decided to go to Vieques in the Porto Rico. Bought all our goods from quartermaster's wharf and hotel. Drove and driven away. Went aboard the steamer about 4 pm. Left cable message for M. to be delivered tomorrow.

Mr. Bird of Fajardo last night told me that he would wait to go to Culebra til Sunday when he would take the 'Longfellow', or to go with him and he promised to arrange for a boat taking us to St. Thomas, provided we could not make it in the 'Blake'. Went out after breakfast to shoot birds and was kept busy by the antics of a bird which afterwards turned out to be the Pahu Warbler! In afternoon went out for Arreivas, but it being cloudy none were out and I returned empty-handed. Our telegraph operator succeeded later.

By noon he promised Sapo conductor before 8 o'clock and at 7.30 he sent word that he had 5 and he was correct this time! A beggar whom he met in the morning he engaged and the 6. made 1 peso.

Mr L. Steiner

Dear Sir: Before leaving for St. John. I write to you this few lines in order you may know what I have paid to the men working on the "Tungue trip."

To the old man	I paid -	\$ 1.00
" " " "	that opened the pass	<u>0.75</u>
		\$ 1.75

Now I made the arrangement with my men for $8\frac{1}{2}$ ¢ the ascent and 75¢ the descent. each.	<u>1.62½</u>	91
		11.34

Dis-counting	<u>11.34</u>	for my men
and	<u>1.75</u>	that I paid you -
<u>have to pay only to the old man</u>	\$ 6.81	4
	<u>4.086</u>	

Please give the 13.09 to Mr. Arcadio in order that he pays my men 7.854

Mr. L. Steiner

What is the height of the peaks? What was
the temperature on the night? on morning?

Could you see the coast line to Hreibo.

My address on St. John is

23 Fortalesa St, corner La Cruz -

I'll be glad to see you there -

J. A. J. A. J.
